

Maryland Fabricators was started in 1978 as a welding shop making complicated structural components.

Over the years we have evolved , adding automated equipment and expanding our product line to include standard structural components and miscellaneous metals.

Our market area extends from Massachusetts to Virginia, along the East Coast.

Some notes of interest:

- 1) During a 7 year period we added structural steel and miscellaneous metals to 210 school projects on Long Island.
- 2) We have supplied steel for all means of egress to Manhattan.
- 3) We have supplied steel to Saudi Arabia, used to camouflage back up power plants.
- 4) We have been nominated for three craftsmanship awards in Washington DC, winning twice.

We have fabricated material for the following agencies:

- 1) NYC Transit Authority
- 2) Port Authority of NY and NJ
- 3) Dept. of Transportation, NY State
- 4) Garden State Parkway Authority
- 5) NJ Turnpike Authority
- 6) Amtrack
- 7) NYC Waste Management ( 6 transfer plants)
- 8) US Navy

Having done over 700 projects since our establishment, we have the experience to handle many different types of fabrication and installation.

We have done over 50 renovation projects in the Washington-Baltimore market.

We are very fond of our accomplishments.
